SKILLS

- Python
- JavaScript
- Dart
- Node.JS
- React
- Django
- Flutter
- HTML
- CSS
- Git
- Tailwind CSS
- Docker
- Nginx

LANGUAGES

- English (C1 – Advanced)

SOLOMON WILLIAMS

SOFTWARE ENGINEER

PROFILE

Hello, I'm Solomon – a passionate and driven software engineer with hands-on experience in building full-stack web applications. I specialize in backend development using Django and MySQL, and I'm proficient in React, Next.js, and Prisma ORM for building modern, scalable web applications. I thrive on solving real-world problems, collaborating with teams, and continuously learning new technologies. As a student developer, I actively seek opportunities to contribute to impactful projects while honing my skills.

Key Strengths

- **Full-Stack Web Development:** Experienced in building scalable and maintainable applications using Django, React, Next.js, and Prisma ORM. I create seamless integrations between front-end and back-end systems.
- **Backend Development:** Skilled in building robust server-side logic using Python and Django. Proficient in designing relational databases, optimizing queries, and implementing RESTful APIs using Django REST Framework.
- **Frontend Development:** Proficient in React and Next.js, building dynamic user interfaces using functional components, hooks, and state management. I follow responsive design principles and use Tailwind CSS for efficient styling.
- **API Design:** Experienced in designing and consuming RESTful APIs with secure, scalable, and well-documented endpoints to ensure smooth communication across systems.
- **Problem-Solving:** Strong analytical thinker with a talent for breaking down complex problems and developing practical, efficient solutions. Eager to learn and adopt new tools and methodologies.
- **Collaboration:** Comfortable working in team environments, communicating with designers, developers, and stakeholders to ensure a successful project outcome.

Projects:

- **DC Grocers Gambia:** E-commerce platform built with Next.js, Prisma, MySQL. Implemented product management, admin dashboard, and login email system.
- **Afro-Yemen Charity Site:** Nonprofit landing page built with Next.js and Tailwind. Created secure form with email notification to admin.

Technologies & Tools:

- Languages: Python, JavaScript, Dart
- Frameworks/Libraries: Django, React, React-Native, Flutter, Next.js, Prisma ORM
- Styling: Tailwind CSS, HTML, CSS
- Database: MySQL, PostgreSQL
- Others: Git, REST APIs, JSON, AJAX, NGINX, DOCKER

Continuous Learning: I actively explore new technologies, participate in online communities, and build projects that challenge and expand my skills. I'm committed to staying current with industry best practices and software engineering trends.
